## EDUCATION

<p><b>Doctor of Philosophy (Ph.D.) in Biomedical Engineering</b>  <b>Columbia University School of Engineering and Applied Science</b>          (New York, New York, USA)          Dissertation: "Optimization of sensitivity to disease-associated cortical metabolic abnormality by evidence-based quantification of in vivo <sup>1</sup>H MRS data from 3 T and 7 T"  <i>Bernard Jaffe Prize Nominee for Department of Biomedical Engineering</i></p>	05.22 (m.y.)
<p><b>Master of Science (M.Sc.) in Biomedical Engineering</b>  <b>Columbia University School of Engineering and Applied Science</b>          (New York, New York, USA)          G.P.A.: 4.17/4.3 (A=4.0)</p>	05.18
<p><b>Master of Science (M.Sc.) in Korean Medicine (program in Korean)</b>  <b>Kyung Hee University Graduate School of East-West Medical Science</b>          (Seoul, Republic of Korea)          G.P.A.: 4.3/4.3 (A=4.0)          Thesis: "Effect of moderate left parietal cortical contusion injury at 3 weeks of age on behavioral responses to addictive drugs in the adult male C57Bl/6 mouse"  <i>Department of East-West Medicine Outstanding Thesis Award</i></p>	03.15
<p><b>Bachelor of Arts (B.A.) magna cum laude in Neurobiology, citation in French</b>  <b>Harvard University</b>          (Cambridge, Massachusetts, USA)          G.P.A.: 3.92/4.0  <i>Phi Beta Kappa</i></p>	06.09

## RESEARCH EXPERIENCE

<p><b>Postdoctoral Research Scientist, Columbia University Department of Biomedical Engineering (MR-SCIENCE Laboratory)</b>          Development and sharing of data processing, modeling, hypothesis testing, and machine-learning pipelines for human cortical magnetic resonance spectroscopy data and application to understanding brain metabolism in multiple sclerosis and post-traumatic stress disorder.  <i>Contact: Christoph Juchem, Ph.D., Associate Professor of Biomedical Engineering and Radiology, Columbia University School of Engineering and Applied Science and Columbia University Medical Center (<a href="mailto:cwj2112@columbia.edu">cwj2112@columbia.edu</a>)</i></p>	01.06.22- present (d.m.y.)
<p><b>Doctoral Research Associate, Columbia University Department of Biomedical Engineering (MR-SCIENCE Laboratory)</b>          Development of data processing, modeling, hypothesis testing, and machine-learning pipelines for human cortical magnetic resonance spectroscopy data and application to understanding brain metabolism in multiple sclerosis and post-traumatic stress disorder. Preliminary methods development for establishment of ultra-high-field human magnetic resonance spectroscopy research program at Columbia.  <i>Contact: Christoph Juchem, Ph.D., Associate Professor of Biomedical Engineering and Radiology, Columbia University School of Engineering and Applied Science and Columbia University Medical Center (<a href="mailto:cwj2112@columbia.edu">cwj2112@columbia.edu</a>)</i></p>	01.09.16 -31.05.22
<p><b>Postgraduate Associate, Yale School of Medicine Department of Radiology (Juchem Group)</b>          Applying proton magnetic resonance spectroscopy at 7 Tesla to the study of multiple sclerosis pathophysiology in human subjects. Engaged in all aspects of the research process, from grant-writing and experimental design to data acquisition, processing, and manuscript composition.  <i>Contact: Christoph Juchem, Ph.D., formerly Assistant Professor of Diagnostic Radiology and Neurology, Yale School of Medicine (<a href="mailto:cwj2112@columbia.edu">cwj2112@columbia.edu</a>)</i></p>	21.08.15- 21.08.16

<p><b>Collaborator, Kyung Hee University Department of East-West Medicine (Park Group)</b> Exploring the effects of unfocused pulsed ultrasonic stimulation as well as various pharmaceuticals on spontaneous and evoked hippocampal activity using 60-channel microelectrode array recordings from organotypic slice cultures. Supported experimental design and led efforts in data processing, statistical analysis and interpretation, manuscript writing, and submission procedures for multiple manuscripts, posters, and presentations, including two co-authored publications. Working language Korean. <i>Contact: Jiho Park, Ph.D., East-West Medical Science Department Director, Kyung Hee University Graduate School of East-West Medical Science (<a href="mailto:jihopark@khu.ac.kr">jihopark@khu.ac.kr</a>)</i></p>	01.14- 09.16 (m.y.)
<p><b>Graduate Researcher, Kyung Hee University Medical Center Central Laboratory (Maeng Group)</b> Analyzed efficacy of small molecules in preclinical mouse models of affective disorders. Explored behavioral responses to addictive drugs in mice subject to developmental controlled cortical impact. Designed, implemented, analyzed, interpreted, and reported behavioral tests; executed controlled cortical impact surgery; extracted and stained mouse brain tissue; co-authored three publications. Managed laboratory finances for one semester; trained two new students in rodent handling, behavioral and data analysis, and laboratory best practice. Working language Korean. <i>Contact: Sungho Maeng, M.D., Ph.D., Assistant Professor of Integrative Medicine, Kyung Hee Medical Center (<a href="mailto:jethrot@khu.ac.kr">jethrot@khu.ac.kr</a>)</i></p>	03.13- 06.15
<p><b>Research Assistant, Walter Reed Army Medical Center Department of Neurology (Tsao Group)</b> Studied the effects of various behavioral regimens for phantom limb syndrome on dexterity and cognition and explored ways to improve current phantom pain therapies with medication, virtual reality, and application of the DARPA Proto 2 upper-limb neural prosthesis. Tested subjects on paper- and activity-based cognitive batteries; processed and interpreted statistics; composed several clinical experimental protocols; co-authored two research publications and two book reviews. <i>Contact: Captain Jack W. Tsao, M.D., D.Phil, US Navy Bureau of Medicine and Surgery Director of Traumatic Brain Injury (TBI) Programs (<a href="mailto:jtsao@uthsc.edu">jtsao@uthsc.edu</a>)</i></p>	06.07- 09.07
<p><b>Research Assistant, Harvard Medical School Department of Psychiatry (Stickgold Group)</b> Studied the effects of sleep on the relationship between emotional valence and gist versus detail memory; investigated the effect of napping on gist memory. Tested subjects on computerized and paper-based batteries; administered electroencephalograms; co-authored one publication. <i>Contact: Jessica Payne, Ph.D., Collegiate Chair in Psychology, University of Notre Dame (<a href="mailto:jpayne7@nd.edu">jpayne7@nd.edu</a>)</i></p>	10.06- 12.08
<p><b>Pre-College and Undergraduate Laboratory Intern, Argonne National Laboratory (MacDonell Group)</b> Aided development of Environmental Protection Agency (EPA) Provisional Advisory Levels (PALs). Led development of draft PAL report for tetraethyl pyrophosphate (80+ pages; compiled dose-effect relationships from experimental and case reports and applied them to PAL derivations); expanded PAL reports for methanol, sarin, strychnine, and diacetylmorphine; analyzed primary literature to tabulate aquatic and atmospheric fate and exposure symptoms of 75+ toxic industrial chemicals and warfare agents. <i>Contact: Margaret MacDonell, Ph.D., Project Manager, ANL Environmental Assessment Division (<a href="mailto:macdonell@anl.gov">macdonell@anl.gov</a>)</i></p>	05.06- 08.06; 06.05- 08.05
<p><b>Research Assistant, Harvard University Department of Psychology (Schacter Group)</b> Studied the effects of emotional valence on younger and older adults' reality-monitoring abilities. Tested subjects on computerized memory assays; calculated and interpreted statistics; composed draft methods and results sections for co-authored publication. <i>Contact: Elizabeth Kensinger, Ph.D., Assistant Professor of Psychology, Boston College (<a href="mailto:elizabeth.kensinger@bc.edu">elizabeth.kensinger@bc.edu</a>)</i></p>	10.05- 02.07

## SELECT ACADEMIC TALKS AND DISCUSSIONS

<b>Meet the experts in magnetic resonance spectroscopy</b> Session moderator for MRS workshop 2022 (virtual discussion)	23.08.22 (d.m.y.)
<b><sup>1</sup>H MRS-visible diagnostic biomarkers for progressive multiple sclerosis</b> Works in Progress, Columbia Magnetic Resonance Research Center Group Meeting	04.02.22
<b>Exploratory data analysis in R</b> Workshop leader, MR SCIENCE Laboratory Programming Monthly (virtual tutorial)	07.03.22, 10.01.22
<b>There is no "I" in "spectroscopy": How should we distinguish our research in an increasingly collaborative world?</b> Panel discussion moderator, 5 <sup>th</sup> Annual INSPECTOR MR Spectroscopy Workshop 2021 (virtual workshop)	19.11.21
<b>Development of <sup>1</sup>H MRS-visible diagnostic biomarkers for progressive multiple sclerosis</b> Webinar: Emerging Research and Trial Strategies for Progressive Multiple Sclerosis, New York Academy of Sciences	04.10.21
<b>7-Tesla proton magnetic resonance spectroscopy of post-traumatic stress disorder and major depressive disorder: Data processing and statistical considerations</b> Inaugural Works-in-Progress series kickoff, Graduate Organization for Biomedical Engineers, Columbia University (virtual seminar)	20.08.21
<b>What can <sup>1</sup>H MR spectroscopy tell us about brain disease? In vivo insights on post-traumatic stress disorder and multiple sclerosis from 7 Tesla</b> Johns Hopkins University School of Medicine Division of Cancer Imaging Research (virtual seminar)	21.05.21
<b>Evidence-based quantification of in vivo proton magnetic resonance spectroscopy data from 3 T and 7 T: Towards optimized identification of disease-associated cortical metabolic abnormality</b> Johns Hopkins University School of Medicine Department of Radiology and Radiological Science (virtual seminar)	19.02.21
<b>Validating linear combination models for <sup>1</sup>H MRS quantification</b> 4 <sup>th</sup> Annual INSPECTOR MR Spectroscopy Workshop 2020 (virtual workshop)	20.11.20
<b>Hunting the perfect spline: Baseline handling for accurate macromolecule estimation and metabolite quantification by in vivo <sup>1</sup>H MRS</b> International Society for Magnetic Resonance in Medicine Spectroscopy Study Group (virtual power pitch) <i>Voted 3<sup>rd</sup>-place abstract among all trainee posters in spectroscopy at International Society for Magnetic Resonance in Medicine 28th Annual Meeting</i>	25.08.20
<b>How open should our science be?</b> Panelist for discussion by Reproducible Research Study Group at International Society for Magnetic Resonance in Medicine 28th Annual Meeting (virtual symposium)	14.08.20
<b>Baseline definition tool for accurate metabolite quantification via <sup>1</sup>H MRS processing and quantification software INSPECTOR</b> International Society for Magnetic Resonance in Medicine Reproducible Research Study Group (virtual power pitch)	17.07.20

<b>Evidence-based in vivo proton magnetic resonance spectroscopy for neuroscience applications</b> Engineering Graduate Student Council Research Seminar Series, Columbia University (virtual seminar)	05.08.20
<b>In vivo proton magnetic resonance spectroscopy: Potential and recommendations for neuroscience applications</b> Chan-Zuckerberg Initiative Neurodegeneration Community Project (virtual seminar)	07.04.20
<b>Evidence-based neurochemical profiling by in vivo proton magnetic resonance spectroscopy at ultra-high field: Application to multiple sclerosis</b> Lund University Department of Experimental Medical Science; Lund, Skåne, Sweden	09.01.20
<b>Evidence-based <sup>1</sup>H MRS spectral fitting and quantification: Application to multiple sclerosis</b> Columbia University Medical Center; 3 <sup>rd</sup> Annual INSPECTOR MR Spectroscopy Workshop 2019 in New York, NY, USA	22.11.19
<b>In vivo evidence of differential glutathione metabolism in relapsing-remitting and progressive multiple sclerosis</b> New York Genome Center; Center for Translational and Computational Neuroimmunology Annual Retreat in New York, NY, USA	07.03.19
<b>In vivo magnetic resonance proton spectroscopy data processing and quantification</b> Columbia University Medical Center; 2 <sup>nd</sup> Annual INSPECTOR MR Spectroscopy Workshop 2018 in New York, NY, USA	26.11.18
<b>Measuring brain metabolites with in vivo proton MR spectroscopy: Applications to multiple sclerosis</b> Columbia University School of Engineering and Applied Science; Columbia Biomedical Engineering Annual Retreat in New York, NY	06.09.18
<b>Towards in vivo neurochemical profiling of multiple sclerosis with MR spectroscopy at 7 Tesla: Apparent increase in frontal cortex water T<sub>2</sub> in aged individuals with progressive multiple sclerosis stabilizes in biexponential model constrained by tissue partial volumes</b> International Society for Magnetic Resonance in Medicine; Annual Meeting 2018 in Paris, France	18.06.18
<b>Magnetic resonance spectroscopy of multiple sclerosis pathology</b> Columbia University Medical Center; 1 <sup>st</sup> Annual INSPECTOR MR Spectroscopy Workshop 2017 in New York, NY, USA	08.12.17
<b>In vivo quantification of glutathione T<sub>2</sub> in the human brain at 7 Tesla</b> Yale School of Medicine; Magnetic Resonance Research Center Works in Progress Series in New Haven, CT, USA	30.06.16
<b>Animal experimentation in the neurosciences: Helping us understand ourselves?</b> Kyung Hee University Department of East-West Medical Science; Korean-language guest lecture for undergraduate Introduction to Neuroscience course in Suwon, Republic of Korea	04.05.15
<b>Prolonged stimulation with low-intensity ultrasound induces delayed NMDA-dependent increases in spontaneous hippocampal culture spike activity</b> Kyung Hee University; The 12 <sup>th</sup> Korea-Japan Joint Symposium of Brain, Cardiac, and Smooth Muscle Sciences in Suwon, Republic of Korea <i>1<sup>st</sup> place Graduate Student and Postdoctoral Fellow Presentation Award</i>	01.22.15
<b>Task-specific self-efficacy and short-term memory performance</b> Southern Illinois University; Illinois Junior Science and Humanities Symposium in Carbondale, IL, USA	04.04.05

## PROFESSIONAL SOCIETY MEMBERSHIPS

International Society for Magnetic Resonance in Medicine (ISMRM) (2017-present)	ISMRM Psychiatric MR Spectroscopy & Imaging (01/2018-present)
ISMRM High Field Systems & Applications (01/2018-present)	ISMRM White Matter (01/2019-present)
ISMRM MR Spectroscopy (01/2018-present)	ISMRM Quantitative MRI (01/2019-present)
ISMRM Reproducible Research (01/2019-present)	ISMRM Detection and Correction of Motion in MRI & MRS (01/2019-20)
ISMRM Current Issues in Brain Function (01/2018-present)	ISMRM Molecular and Cellular Imaging (01/2019-20)
Society for Industrial and Applied Mathematics SIAM (2017-present)	New York Academy of Sciences (NYAS) (2019-present)
	Institute of Electrical and Electronics Engineers IEEE (2017-19)

## PUBLICATIONS REFEREED

---

*NMR in Biomedicine* (2020-2022); *Multiple Sclerosis Journal* (2022); *Frontiers in Neurology* (2021) ; *Journal of International Medical Research* (2020, 2021); *npj Digital Medicine* (2020); *Neuroscience Letters* (2020); *Acta Neurologica Belgica* (2020)

## CONFERENCE ABSTRACT REVIEW

---

International Society for Magnetic Resonance in Medicine Annual Meeting (2019-2022)  
Gordon Research Seminar for In Vivo Magnetic Resonance (2022)

## GRANT REVIEW

---

Invited external grant reviewer for Precision Medicine Alliance Scotland (2021)

## SOFTWARE

---

**INSPECTOR (C. Juchem, 2016).** MATLAB-based spectral processing and analysis tool by C. Juchem. Contributed functions for batch simulation and spectral quantification (*Proc Int Soc Magn Reson Med* 2019, 4237; 2020, 2856; 2021, 2010; 2022, 0430), regularized spline baseline handling for linear combination modeling (*Proc Int Soc Magn Reson Med* 2020, 2856; 2021, 2010), and Cramér-Rao Lower Bound calculation for baseline shapes (*Proc Int Soc Magn Reson Med* 2021, 2010).

**MATLAB Fig to JPEG Converter (2017).** Written in MATLAB; compiled for Windows. A simple tool for a simple but frustrating problem for those without a MATLAB license: Converting a directory of MATLAB .fig files to easily viewable .jpg image files. Available online at [www.kelleyswanberg.com/other/](http://www.kelleyswanberg.com/other/).

**Multi-Channel Stopwatch. (2013).** Written in Processing; compiled for Linux, Mac, and Windows. Records the times and durations of up to 499 instances each of five different channels of events; automatically sums each channel of data by minute. Data optionally exported as text file after each session. Available online at [www.kelleyswanberg.com/other/](http://www.kelleyswanberg.com/other/).

## SELECT AWARDS

---

<b>Bernard Jaffe Prize Nominee for Biomedical Engineering</b> <i>Departmental nominee for Biomedical Engineering, Columbia University School of Engineering and Applied Science</i>	2022
<b>3<sup>rd</sup> Place Trainee Poster and Virtual Power Pitch in Spectroscopy at ISMRM 28<sup>th</sup> Annual Meeting</b> <i>International Society for Magnetic Resonance in Medicine MR Spectroscopy Study Group</i>	2020
<b>Professional Development Scholarship</b> <i>Engineering Graduate Student Council, Columbia University School of Engineering and Applied Science</i>	2019, 2018
<b>Educational Stipend</b> <i>International Society for Magnetic Resonance in Medicine Annual Meeting</i>	2019, 2018, 2017
<b>Liu Ping Fellowship</b> <i>Columbia University Fu Foundation School of Engineering and Applied Science</i>	2017
<b>Outstanding Thesis Award</b> <i>Kyung Hee University Graduate School of East-West Medical Sciences Department of East-West Medicine</i>	2015
<b>1<sup>st</sup> Place Graduate Student and Postdoctoral Fellow Presentation Award</b> <i>12<sup>th</sup> Korea-Japan Joint Symposium of Brain, Cardiac, and Smooth Muscle Sciences</i>	2015
<b>Best Poster Award</b> <i>Korean Society of Brain and Neural Science, 3<sup>rd</sup> Congress of the Asian Society of Neuropathology, and Korean Society for Neurodegenerative Disease Joint Conference 2014</i>	2014

<b>Phi Beta Kappa</b> (selection based on G.P.A. and professor recommendations)	2009
<b>John Harvard Scholar</b> (top 5% of the Harvard Class of 2009)	2007, 2006
<b>Detur Book Prize</b> (top 50 students of the Harvard Class of 2009)	2006

## TEACHING AND OUTREACH

### Research associates mentored:

Catherine M. Medeiros (undergraduate), Columbia University School of Engineering and Applied Science	2021-present
Leonardo Campos (undergraduate), Columbia University School of Engineering and Applied Science	2020-present
Gabriela Gonzalez (undergraduate), Columbia University School of Engineering and Applied Science	winter 2020
Abhinav Kurada (undergraduate), Columbia University School of Engineering and Applied Science	2016-2020
Cathy Choo (high school), Townshend Harris High School	summer 2019
Isabel Abonitalla (undergraduate), Hunter College	summer 2017
Jiyun Kang (Masters), Kyung Hee University School of East-West Medical Science	spring 2014
Suck Lee (Masters), Kyung Hee University School of East-West Medical Science	spring 2014

### Seminar Host, Columbia Neuroscience Seminar Talk Series

Hosted Columbia Neuroscience Seminar talk and two-day virtual university visit by Dr. Jessica Payne, Professor of Psychology at the University of Notre Dame. (0 to 5 hours/week)	04.22 (m.y.)
---	--------------

### International Society for Magnetic Resonance in Medicine (ISMRM) Spectroscopy Study Group Code and Data Sharing Committee

Five-member collaboration through the International Society for Magnetic Resonance in Medicine for driving field-wide initiatives toward raw data sharing and open-source toolkits. Current manager of project for building a repository of freely available datasets for standardized validation of spectral processing and quantification procedures. (0 to 5 hours/week)	summer 2021-present
---	---------------------

### Co-Director, Columbia Collaboratory Magnetic Resonance Spectroscopy Journal Club

Co-director together with professors at Columbia Schools of Engineering and Medicine and psychiatrists at the New York State Psychiatric Institute for interdisciplinary monthly journal club on papers in magnetic resonance spectroscopy. (0 to 3 hours/week)	spring 2021-present
---	---------------------

### Interviewer for Undergraduate Admissions, Harvard University Faculty of Arts and Sciences

Interview prospective undergraduates and report to admissions committee for Harvard College Class of 2026. (0 to 3 hours/week)	2022
--	------

### Teaching Fellow, Principles and Practices of In Vivo Magnetic Resonance Spectroscopy

Columbia University School of Engineering and Applied Science graduate-level laboratory course on in vivo MRS. (5 to 20 hours/week)	fall 2019, 2020, 2021
---	-----------------------

### Teaching Fellow, Principles of Magnetic Resonance Imaging

Columbia University School of Engineering and Applied Science graduate-level course in MRI. (5 to 20 hours/week)	spring 2018
--	-------------

### Member, Columbia Neuroscience Seminars Selection Committee (Subcommittee for Brain Disease)

Selection committee comprising faculty and trainee members for Columbia Neuroscience Seminar speakers. (0 to 4 hours/week)	2019-2021
--	-----------

### Workshop Leader for Coding in Python and Reading a Scientific Paper, New York Bioforce

Developed and led two sessions within intensive summer bootcamp for high school students interested in STEM. (0 to 4 hours/week)	summer 2019
--	-------------

### Department Representative for Biomedical Engineering, Women in Science at Columbia

Organization for campus programming and outreach focused on women in STEM. (0 to 2 hours/week)	09.16-08.19
--	-------------

### Alumnus Mentor, Give Something Back Foundation

Professional development coaching for outstanding low-income high school students in Illinois. (0 to 1 hour/week)	11.16-present
---	---------------

### Course Proctor, Brain Education Day, Yale University Department of Neuroscience

Co-taught seminar on magnetic resonance neuroimaging methods to New Haven junior high and high school students.	03.15
---	-------

<p><b>Graduate Coach, InGenius Prep</b> One-on-one weekend tutoring in standardized testing and high school math and science for high-achieving students from the United States and Asia. (0 to 5 hours/week)</p>	07.15-07.16
<p><b>Instructor, AP Biology</b> Proctored accelerated virtual summer course encompassing two semesters of AP Biology for rising high school junior; comprehensive weekend tutoring throughout academic year. Student scored 5/5. (2 to 8 hours/week)</p>	06.15-16
<p><b>Writing Instructor</b> One-on-one online coaching in college analytical writing techniques. (10 to 15 hours/month)</p>	winter 2012 to fall 2013
<p><b>Course Preceptor and Teaching Assistant, Peking University Department of History</b> Designed and taught advanced undergraduate history seminar on historical research methods entitled “Methods in Historical Research and Exposition: A Process-Based Approach to World History.” Sole teaching assistant and discussion leader of world history course for first- and second-year undergraduate students entitled “Readings in World History I.” (10+ hours/week)</p>	fall 2009 to fall 2010
<p><b>Award Peer Tutor in Multivariable Calculus, Harvard University Bureau of Study Counsel</b> Tutored two Harvard undergraduates in multivariable calculus. (3 to 4 hours/week)</p>	fall 2007
<p><b>SAT Coach and Educational Consultant, Strategy Alpha International</b> Designed and taught four classes daily of SAT mathematics and writing to Chinese high school students; held several daily office hours for perfecting personal statements, interviewing strategies, and college choices during two-week college-preparatory boot camp. (40+ hours/week)</p>	07.07
<p><b>SAT Coach</b> Intensive one-on-one tutoring of American, British, and Chinese students in all sections of the SAT. (4 to 20 hours/week)</p>	summer 2008 to fall 2011

## NON-ACADEMIC WORK EXPERIENCE

<p><b>Content Production Manager, I Dig Culture</b> Managed a team of writers across four different countries to produce content for an international media channel promoting the critical analysis of cultural difference. (3 to 10 hours/week)</p>	05.14-05.15 (m.y.)
<p><b>Staff Writer, The Silk Road</b> Researched and composed brief articles published alongside short documentaries on topics in Korean culture, including traditional music, food, and martial arts, for international audiences. (3 to 5 hours/week)</p>	06.13-05.14
<p><b>Chinese-Korean-English Tour Guide, Korail Travel</b> Trilingual guide for predominantly Chinese tourists at the 2013 Medical and Agricultural Exhibitions in Jeollanam-do, Republic of Korea. Responsibilities included maintaining the safety and morale of foreign guests, calculating and implementing lodging, dining, and transportation logistics, and responsibly handling emergencies and other unforeseen externalities (including illness, lost personal items, and multiple traffic accidents).</p>	10.13
<p><b>Translator and Market Analyst, Netelusion Beijing</b> Chief Chinese-English translator for browser-based strategy game 帝国文明 (Imperial Warfare). Conducted market research, formulated budget reports, developed strategies for marketing Chinese webgames to Chinese-speaking audiences in Singapore, Malaysia, and Taiwan. Developed proficiency in a variety of Internet marketing tools, including Facebook ads, applications, and fan pages; Google ads; Twitter; blogging; and leverage of third-party forums and gaming websites through paid banner ads and solicited reviews. Working language Mandarin Chinese. (40+ hours/week)</p>	09.10-09.11
<p><b>Executive Board Member, Harvard Wushu</b> Managed all aspects of a contemporary kung fu and performance team of up to twenty-five Harvard, MIT, and Wellesley undergraduates, graduate students, faculty, and Cambridge community members; responsibilities included running weekly board meetings with two to four other directors, drafting and presenting semesterly grant proposals, balancing budgets, leading practices, choreographing performances, ordering uniforms and equipment, planning social events, maintaining campus visibility, and recruiting new members. (2 to 3 hours/week)</p>	winter 2006- spring 2009

<p><b>CEO and Co-Founder, IMUSE Foundation</b> Co-founded 501(c)(3) national nonprofit organization designed to facilitate networking among exceptional students from the United States and China; our 2009 program focused on a two-week conference of over fifty people in Beijing in August. Oversaw the activities of a binational board and staff of twenty-one and managed the transition from startup project to lasting charitable foundation. (10 to 40+ hours/week)</p>	09.08-09.09
<p><b>Executive Director, Initiating Mutual Understanding through Student Exchange (IMUSE) 2008</b> Managed cultural exchange program with \$300,000 budget designed to present an objective and multifaceted view of modern China and the Beijing Olympics to North American college students; included a tour by fourteen student delegates from Tsinghua and Peking Universities of eleven North American tertiary schools to facilitate public panel discussions, dinners, and speaker events; a continent-wide essay and photo competition; and a fourteen-day fellowship at the 2008 Beijing Olympics. I sat on the seven-member executive board overseeing the whole project and acted as one of four managing directors for the Beijing Olympic Fellowship Program. (10 to 35 hours/week)</p>	08.07-08.08
<p><b>Product Analyst, MySpace China</b> Interned for product department in Beijing headquarters of MySpace.cn; gave presentations in English and Mandarin Chinese analyzing the relative benefits and disadvantages of competing websites; composed a 21-page research report in Mandarin Chinese and English on the demographics and needs of MySpace photography album tool users. (40+ hours/week)</p>	06.16.08-07.25.08

## LANGUAGES

---

**English:** Native speaker

**Korean:** Professional working proficiency

*Master of Science with perfect G.P.A. in Korean-language graduate program (spring 2015)*

**Mandarin Chinese:** Professional working proficiency (simplified >> traditional)

*New HSK Level 6/6 certification (fall 2011)*

**French:** Advanced working proficiency

*French Chamber of Commerce First Degree Diplôme of Business French with highest mention of excellence (spring 2008)*

**Swedish:** Estimated B1/2-level proficiency in speaking, listening, reading, and writing

*Duolingo Events Ambassador and event leader for monthly Swedish-only conversation group Svenska i New York (2019-present)*

## OTHER TRAINING

---

<p><b>EPIC Sequence Development Environment Programming, GE Healthcare, New York, NY, USA</b> Magnetic resonance scan sequence development in GE EPIC/Orchestra SDE. Certificate awarded.</p>	05.18 (m.y.)
<p><b>IDEA Sequence Development Environment Programming, Siemens Healthcare, Cary, NC, USA</b> Magnetic resonance scan sequence development in C++-based Siemens IDEA SDE. Certificate awarded.</p>	07.17
<p><b>Collaboratory@Columbia University Data Science Boot Camp, New York, NY, USA</b> Columbia Data Science Institute. Dimension reduction, modeling, neural networks in Python. Certificate awarded.</p>	01.17
<p><b>Data Analysis, Johns Hopkins University through Coursera.org</b> Prof. Jeff Leek. Weekly quizzes and two peer-graded analysis reports. Final grade 98.7%.</p>	10.13-12.13
<p><b>Computational Neuroscience, Washington University through Coursera.org</b> Profs. Adrienne Fairhall and Rajesh Rao. Weekly problem sets. Final grade 97.7%.</p>	01.14-03.14
<p><b>Yonsei University Korean Language Institute, Seoul, Republic of Korea</b> Intermediate Korean (Levels 3 and 4 of 6). Level 5 audited. Composite grade 92%.</p>	01.12-08.12
<p><b>Tsinghua University International Chinese Language and Culture Center Mandarin Program, Beijing, China</b> Intermediate and Advanced Mandarin Chinese. Composite grade 96.7%.</p>	09.09-07.10

---

## OTHER SKILLS

---

**Laboratory:** 7T and 3T MR safety; in vivo proton magnetic resonance imaging (MRI) and spectroscopy (MRS) scanning in human participants (Siemens syngo.MR and Varian VnmrJ); mouse care, handling, and behavioral testing (open field test, elevated plus maze, light-dark box test, passive avoidance, conditioned fear, rotarod, pole test, novel object test, water plus maze, Morris water maze, conditioned place preference, Y-maze, behavioral sensitization); intraperitoneal injection (mouse); decapitation and brain extraction (mouse); controlled cortical impact survival surgery (mouse); triphenyl tetrazolium chloride staining; elementary 10-20 polysomnography implementation (human)

**Programming and analysis:**

MATLAB, R, Python, Processing, ActionScript 3, SPSS 17-21

Elementary: JavaScript, Jekyll, AWS ec2, PHP, HTML, SQL, C, C++, IDEA (Siemens), EPIC (GE)

**Design:** CorelDraw 2018-20, Adobe Flash CS4, Photoshop/Photoshop Elements, PaintShop Pro, freehand projection drawing
